

Security Framework Summary

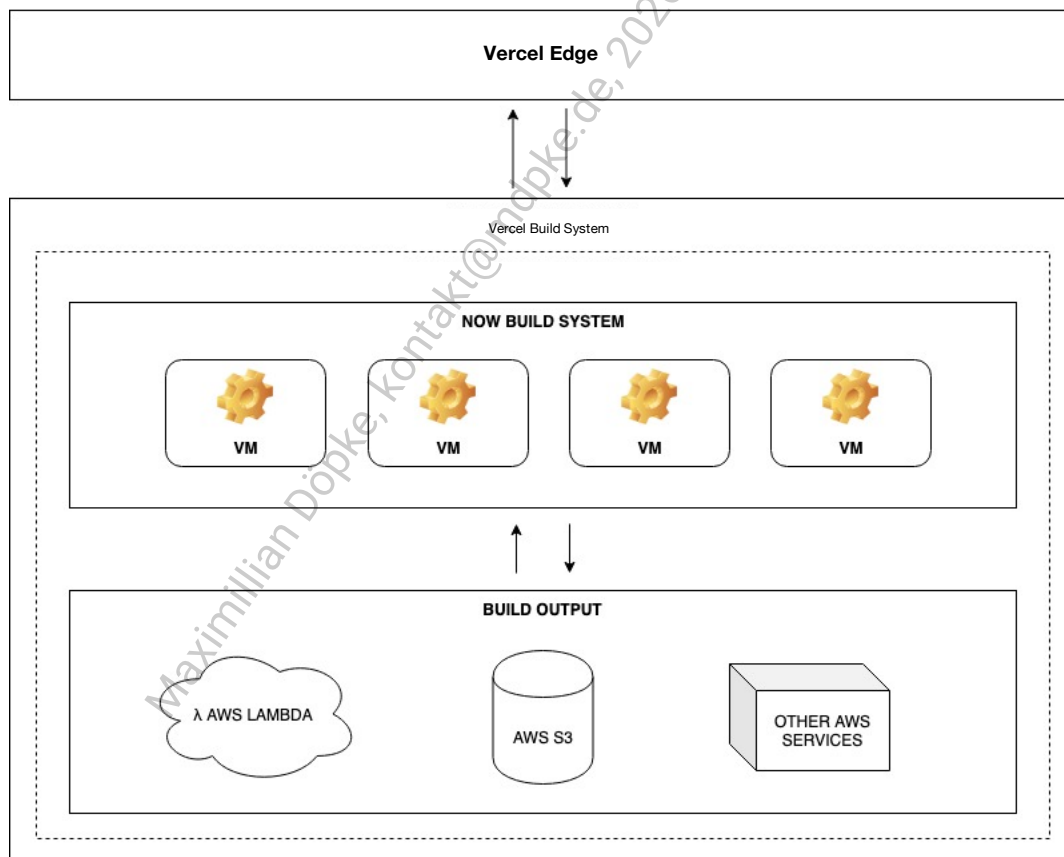

Goal

The goal of this document is to provide a diagram of the implementation and security of the infrastructure and data flow provided by VERCEL to its customers.

Implementation

Build System – Once a new deployment is initiated using Now, the files will be uploaded to the Vercel Build System hosted within Vercel's AWS Account. A dedicated VM will build the deployment using any of the Vercel builders. Once the build finishes, its output will be saved, either to a Lambda function or S3 Bucket.

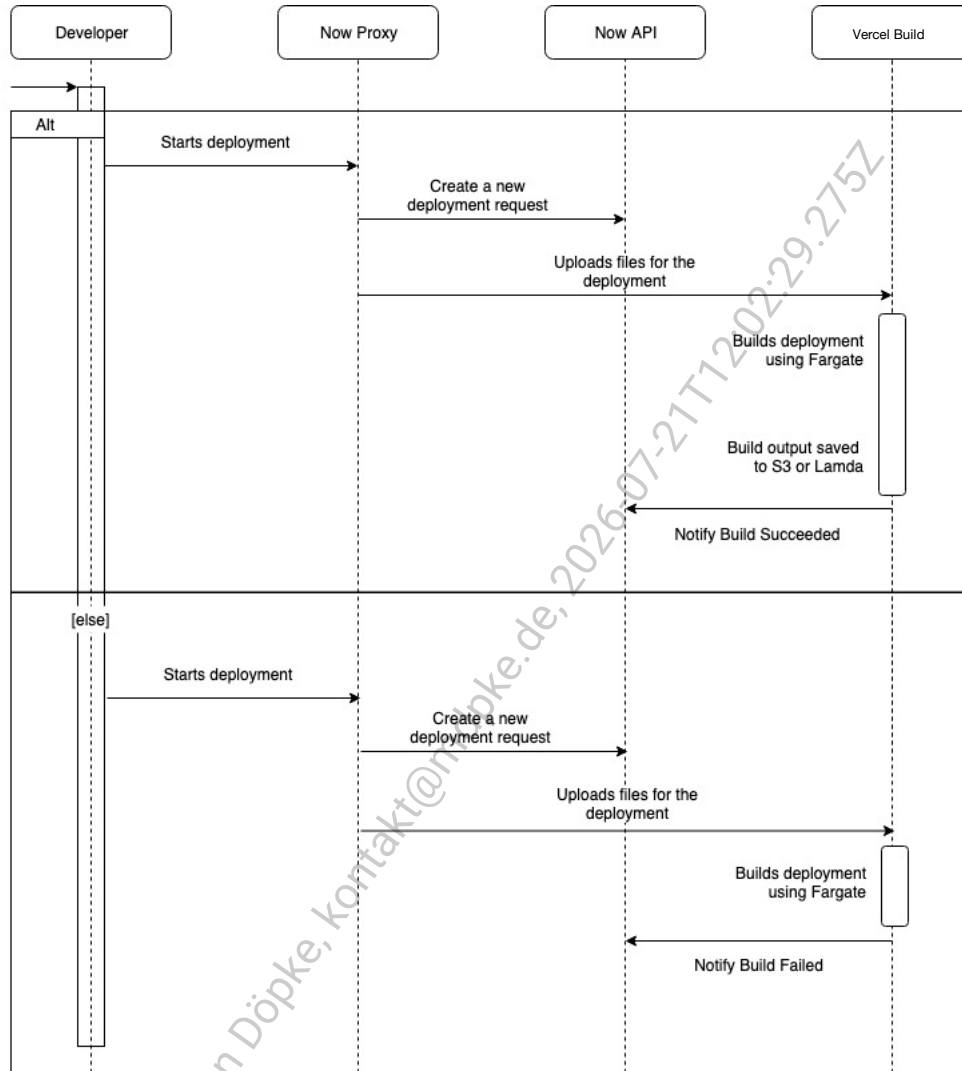

ENTERPRISE DATA FLOW BUILD SYSTEM

VERCEL, Inc

1046 Kearny Street, San Francisco, CA 94133

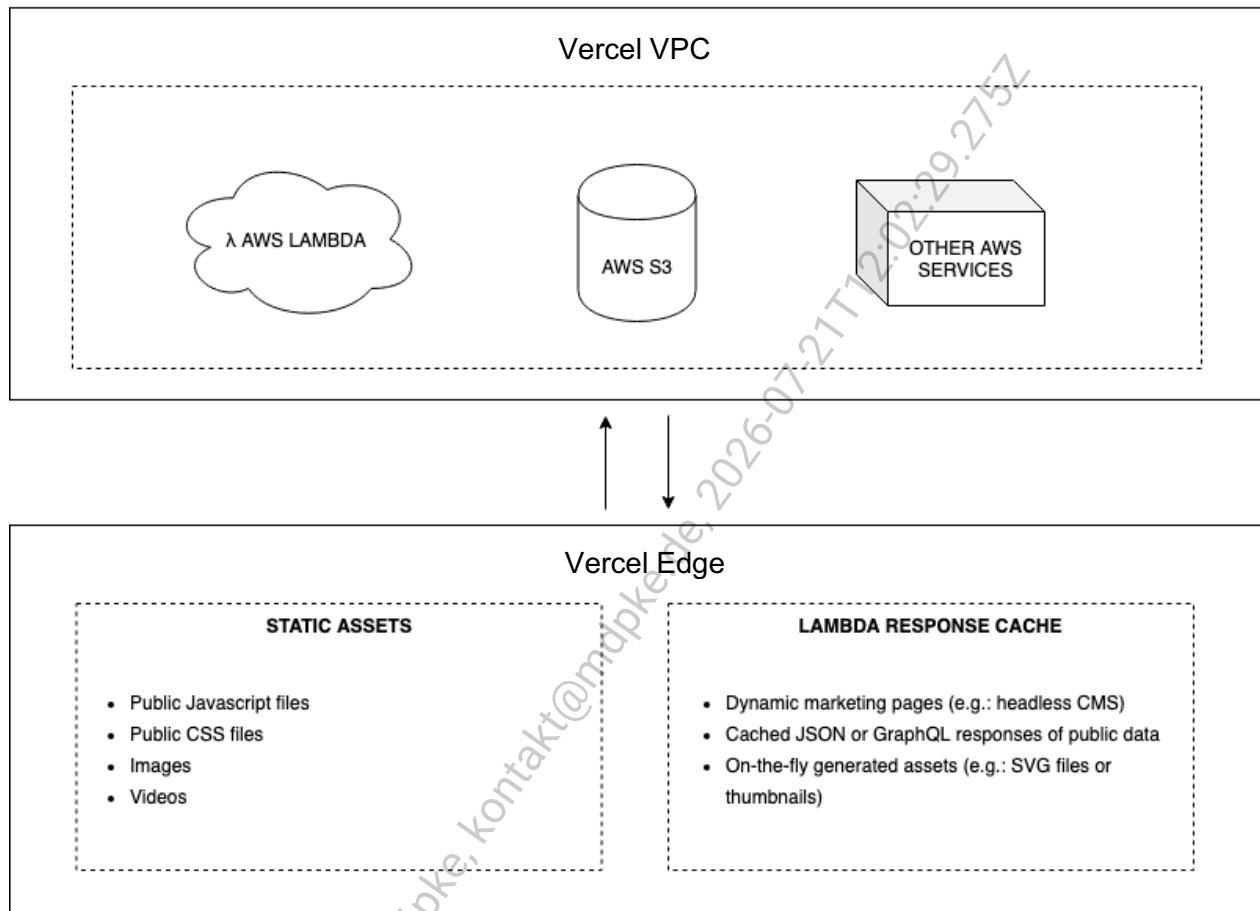

t: 415-855-1452 e: support@Vercel.co

Runtime – As shown in the diagram below, each time a request is made to a customer deployment, it will be handled by the Vercel Edge protecting it from DDoS attacks.

ENTERPRISE DATA FLOW
